

# NicholasAntonov

// Software Engineer // Student // Technology Enthusiast

## About

Name  Nicholas Antonov  
Address  1 Castle Point Terrace,  
Hoboken N.J. Box S-0051  
Phone  +551 482-0926  
Email  nicholas.antonov@gmail.com  
Github  github.com/nicholasantonov

## Skills

Coding 

Javascript Python  
Ocaml Java Clojure  
C C++ F# Racket  
Linux Bash SQL Git

Tools 

## Experience

6/16 ~ 8/16 **Software Engineer Internship @ Jet.com**  
12/6 ~ 5/17

- Developed the front end of Jet with tight performance and compatibility constraints
- Created BDD style testing frameworks for automated browser tests
- Improved build processes across the front end project
- Containerized services for easier development using Docker
- Implemented F# microservices at a smaller scale to aid new developers

8/15 ~ 12/15 **Fullstack Developer Internship @ Occamsec**

- Took a leadership role in software design and implementation
- Gained knowledge of the needs of pentesters to define project specifications
- Architected and implemented tools to store, analyze, and visualize data
- Parsed and reverse engineered proprietary file formats
- Wrote scripts to automate recurring tasks

5/14 ~ 8/14 **Software Engineer Internship @ Eikos Partners**  
1/15 ~ 5/15

- Modified and extended our in-house JavaScript framework
- Refactored and built custom data visualizations using D3.js
- Modernized Javascript stack with tools like JSPM, Yeoman, and Gulp
- Worked with external clients to create single page web applications

## Side Projects

- Estimated velocity of cars from dashcam footage using neural nets. OpenCV, pyBrain.
- Modular Game engine with game to demonstrate features. C++, Ncurses.
- IRC bot that manipulates the chat of interactive twitch.tv streams. Python, Sockets.
- Gravity based game written for a 48 hours game jam. Java, OpenGL.
- Web-based games written for 24 hour game jams. Javascript, HTML5, Canvas.
- Multiple reactive web applications using technologies such as Meteor and React.
- Hackathon team project to control an egg cooker with a web UI. Socket.io, Express.

## Currently Attending

Stevens Institute of Technology **Major:** Computer Science

**Major GPA:** 3.75

- Upsilon Pi Epsilon CS Honors Society
- Presidential Scholarship
- Dean's List
- Stevens Computer Science Club
- Stevens Game Development Club
- Stevens Cyber Defense Team (President)
